

CBD, Cannabis, and Lung Cancer: What Does the Latest Research Say?

Could CBD and/or cannabis help lung cancer patients? A clinical pharmacist at the Skaggs School of Pharmacy and Pharmaceutical Sciences at the University of Colorado Anschutz Medical campus talks about her work assisting neurology patients and her clinical research, including work on cannabis clinical trials.

In this episode, Jacqui Bainbridge, clinical pharmacist, answers questions about symptomatology of CBD & cannabis, the basics about the different forms of CBD/THC, and the importance of quality clinical trials for potential improvement in lung cancer treatments involving CBD or cannabis.

LCFA's mission is the improvement in survivorship of lung cancer patients through the funding of transformative science.

While raising funds to support lung cancer research, LCFA will raise the public's awareness and serve as a resource for patients or anyone seeking answers, hope, and access to updated treatment information, scientific investigation, and clinical trials.

You can also join the conversation with LCFA on [Facebook](#), [Twitter](#), and [Instagram](#).
