

Investment in grants change the future for lung cancer patients

Show Notes

Lung cancer is a disease that affects people: family, friends, co-workers, neighbors. It's a disease that comes with in some stark figures about survival and research funding. But the numbers don't lie, and they also show the amazing strides being made against the disease: increasing survival rates, incredible strides in treatment options, and ever-growing ranks of researchers dedicating their professional careers to improving the odds for people living with lung cancer. Join us for this episode of Hope With Answers: Living With Lung Cancer, where we talk about hope, by the numbers.

Guests:

[Kim Norris](#), Lung Cancer Foundation of America co-founder and president

[Dr. Jessica Donington](#), professor of surgery at the [University of Chicago Pritzker School of Medicine](#)

[Dr. Triparna Sen](#), an assistant attending at Memorial Sloan Kettering Cancer Center

[Kellie Smith, PhD](#), assistant professor of oncology at Johns Hopkins Medicine

Resources:

[Lung Cancer Young Investigator Recipients](#)

LCFA's mission is the improvement in survivorship of lung cancer patients through the funding of transformative science.

While raising funds to support lung cancer research, LCFA will raise the public's awareness and serve as a resource for patients or anyone seeking answers, hope, and access to updated treatment information, scientific investigation, and clinical trials.

You can also join the conversation with LCFA on [Facebook](#), [Twitter](#), and [Instagram](#).
